PAST PERFORMANCE

Transportation Security Administration (TSA), 9th Floor Build Out Spring - Fall 2020 | **Contract Value: \$2,100,000**

Completed the demolition and build out of a 21,000 sq. ft. space to support new operations for the TSA. The project included a complete turnkey design/build approach with all design, construction, functional testing, and closeout under Kroeschell's scope. The project encompassed an entire floor in a facility that remained operational during construction.

University of Colorado, Colorado Springs (UCCS) Downtown Summer - 2019 | **Contract Value: \$232,000**

Completed the demolition and buildout of a downtown space and provided new campus facilities for UCCS. The unique aspect of this project was the quick timeframe this project parameters allowed because of classes already scheduled for the new spaces. Kroeschell designed, permitted, and constructed this project in 30 days. This allowed our customer to hold classes in their new location and expanded their impact on the Colorado Springs area.

Fort Carson, EVANS ARMY COMMUNITY HOSPITAL AHU REPLACEMENT Fall 2017 - Fall 2018 | **Contract Value: \$6,800,000**

The AHU project included an addition to the existing facility, complete OR remodel (9 Operating Rooms), PACU remodel, extensive demolition and abatement, maternity department remodel and three new AHU's with supporting equipment. This project affected departments throughout the hospital and a tremendous amount of coordination/communication was vital to the project's success. During the construction, all departments including the operating rooms remained active to support patient care. The facility mission was never stopped.
